- › Comprehensive React Hooks Guide

IT Manager ·Full-Stack Developer ·Business Intelligence

PROFESSIONAL PROFILE

IT professional with comprehensive experience in technology management, full-stack development, and business intelligence. Currently serving as **IT Manager at Ingnala S.A.**, where I lead end-to-end software projects, generate management reports from production databases, administer servers, and deliver internal training. I combine strategic vision with technical execution, aiming toward roles in **Project Management and technical leadership**.

PROFESSIONAL EXPERIENCE

IT Manager

Apr. 2025 – Present

Ingnala S.A. · Buenos Aires, Argentina

- Manage the full software project lifecycle: requirements gathering, planning, execution, and progress tracking.
- Develop **automated management reports** integrated with the production database, covering portfolio KPIs, client registrations, and cancellations.
- Administer **production server** infrastructure: performance optimization, uptime monitoring, and backup planning.
- Produce technical and functional documentation for internal processes, projects, and systems.
- Design and deliver internal training sessions on **Power BI and Excel** for non-technical teams.
- Provide hardware and software technical support across two companies in the sector, ensuring operational continuity.
- Design and develop full-stack solutions: corporate landing page, stock management SaaS, and an IT ticketing platform with intelligent technician assignment.

Web Designer & Developer

Freelance · Remote

- Developed custom websites applying best practices in performance, accessibility, and user experience.
- Continuously maintained and optimized delivered projects, ensuring stability and functional evolution.

UI/UX Designer

Freelance — Código Zero · Remote

- Designed interactive Figma prototypes for an e-commerce platform, prioritizing usability and visual consistency.
- Ensured design fidelity during implementation through detailed documentation and close coordination with the development team.

FEATURED PROJECTS

IT Ticketing SaaS

SaaS platform for raising and managing IT support tickets, with automatic technician assignment based on expertise. Integrated with the corporate landing page.

React · Node.js · SQL · SaaS

SaaS — Workshop Stock Management

SaaS system for inventory and stock control in a workshop. Includes inflow/outflow modules, alerts, and reporting.

React · Node.js · NoSQL

Corporate Landing — Tech Solutions

Institutional website for an IT solutions company. Premium design, contact form, and services section.

React · Tailwind CSS · Next.js

Management Reports — Ingnala S.A.

Automated reporting suite (PDF + Power BI) covering client portfolio, registration/cancellation KPIs, and projections. Built on real production data.

Python · ReportLab · Power BI · DAX
